Link up with a Tree Mob

Get to know a ginkgo in our Tree Mob scheduled for Wednesday, May 9 at 5:00pm. Tree Mobs are brief interactions in the landscape and living collection with specialists at the Arnold Arboretum. Join us for some spontaneous learning.

Learn about future Tree Mobs:

- Follow us on Facebook or Twitter

- **Maidenhair Tree (Ginkgo biloba ‘Hayanari’)**

  *Ginkgo biloba* is an ancient species with an evolutionary history dating back to the Jurassic Period (~145-200 million years ago). Once found widely distributed around the northern hemisphere, *Ginkgo biloba*’s range was reduced to Asia by glaciers and is rarely found in the wild today. Ginkgo expert Peter Del Tredici will explain the fleeting process of ginkgo reproduction at the time of day when it is visible. Bring an umbrella and a hand lens if you have one.
