Link up with a Tree Mob™

Join a Tree Mob™ on Thursday, January 24 at 3:30pm. Meet at Poplar Gate to walk to *Calocedrus decurrens*, the California incense cedar.

Tree Mobs™ are casual interactions in the landscape and living collection with specialists at the Arnold Arboretum. Join us in the landscape for some spontaneous learning.

**Learn about future Tree Mobs™:**
- Connect on Facebook or Twitter

- Mobile Tree Mob™ (arboretum.harvard.edu/mobile/treemob.html)

● A California Native Thrives in New England

The bright green foliage of California incense cedar can enliven the dullest winter day. *Calocedrus* gets its name from the Greek *kallos*, meaning “beautiful,” and *cedrus*, originally from Latin meaning “evergreen conifer.” Unlike most other conifers, male cones of incense cedar shed pollen on winter’s winds. Visitor Education Assistant Maggie Redfern will show you a pair of trees laden with pollen cones at the base of Peters Hill along South Street. Gather at Poplar Gate to walk to Acc. # 450-86*G, *Calocedrus decurrens*, on January 24 at 3:30pm.

![QR Code for Mobile Tree Mob](https://example.com/qrcode.png)

**Nearest Gate:** Poplar, park along the eastern portion of Bussey Street
